*All price's mentioned in report are based on previous day closing bases.

NIFTY – 23,668.65 (Daily Chart)

• In Tuesday's trading session, the Nifty opened on a positive note and initially continued its northward movement, but failed to sustain the momentum as the session progressed. The index gradually slipped south, giving up early gains and ended the day on a flattish note.

• On the daily chart, a red candle with a long upper wick has formed, signaling selling pressure at higher levels. This indicates that profit booking is active near the horizontal resistance zone, and the RSI in the overbought territory is now a caution signal for the bulls. The index needs to decisively break above the resistance for the uptrend to resume with strength.

For Wednesday's trading session, 23,580 will act as an initial support level and, on the higher end, 23,745 will act as an initial resistance level.

BANK NIFTY – 51,607.95 (Daily Chart)

• In Tuesday's trading session, the Banking Index opened on a positive note but failed to maintain its bullish momentum. The index gradually moved south, erasing initial gains and closing lower, reflecting profit booking at higher levels.

• On the daily chart, a bearish candle has formed, signaling rejection near the upper end of the recent rally. The RSI is in the overbought zone, which suggests the index might be due for a cool-off or consolidation phase. This development calls for caution among bulls, especially if the index fails to reclaim higher levels quickly.

• For Wednesday's trading session, 51,430 will act as an initial support level and on the higher end, 51,800 will act as an initial resistance level.

ECONOMIC NEWS

- India and the US would focus on increasing market access, reducing import duty and non-tariff barriers, and enhancing supply chain integration in the proposed bilateral trade agreement, the government told Parliament Tuesday. In a written reply to the Lok Sabha, Minister of State for Commerce and Industry Jitin Prasada said that as on date, reciprocal tariffs have not been applied by the US on India.
- India must be cautious while negotiating the proposed bilateral trade agreement with the US, as the absence
 of Fast Track Trade Authority in America makes any pact vulnerable to Congressional changes, economic think
 tank GTRI said on Tuesday. It also said that the certification process allows the US to effectively re-negotiate the
 trade agreement after it is signed, demanding domestic legal changes, regulatory reforms, and policy shifts that
 could undermine India's sovereignty.
